

Too Much CSI

Greeley Estates

Best night of my life
The blood and dirt remind me that I'm alive
I failed to see this coming
When all the signs pointed at you I should have known it was you
I should have seen in your eyes It's twisted how you set me up
I never thought that you were who you are
To think I trusted in you
When this was always part of your plan I should have known it was you
I should have seen in your eyes Tie me up behind this truck
So that I won't forget you
Keep dragging me just like you are
You know I won't forget you face I'm holding on for my revenge
'Cause if I die tonight then you get away
The pain is not the issue
Just think of what I'll do to you I should have known it was you
I should have seen in your eyes Tie me up behind this truck
So that I won't forget you
Keep dragging me just like you are
You know I won't forget your face Forget you face, your face
Forget your face I can taste my sweet revenge
You know that we'll meet again
I can taste my sweet revenge
You know that we'll meet again I failed to see this coming
When all the signs pointed at you Tie me up behind this truck
So that I won't forget you
Keep dragging me just like you are
You know I won't forget your face Forget you face, your face
Forget you face, your face
