

Window Seat (feat. Wafia)

Thomston

I've called you names inside my head
But i tell you its ok
And when i meet you in that place we know
I lose everything i should say Give me a window seat
I know the glass can keep me safe
You missed your window when
You promised you would change
Give me a window seat and ill watch you as you drive away
I wanna see your face when you beg for me to stay Boy you've got me paralysed from the waist up
Got so much to say but its better to run
Cause all the words wouldn't be enough
You always like to speak for the both of us I carved your name beside my bed
Cause i don't like it when you are far
But how could you make this all about yourself
When you're so comfortable where you are I gave you a window seat
I knew the glass would keep you safe
I missed my window when i promised i would change
Gave you a window seat and i watch you as you drive away
Tell me you'll face me when i beg for you to stay Boy you've got me paralyzed from the waist up
Got so much to say but its better to run
Cause all the words wouldn't be enough
You always like to speak for the both of us Give me a window seat
I know the glass can keep me safe
I missed my window when i promised i would change
Gave you a window seat and i watch you as you drive away
I wanna see your face when you beg for me to stay Paralyzed from the waist up
Got so much to say but its better to run
Cause all the words wouldn't be enough
You always like to speak for the both of us
