

Paramedic

These Green Eyes

It seems like only yesterday we found ourselves alone
with no one to protect us
don't tells us that you didn't love
the photographs we took of desolation of our homes
it never was enough for you
you take and you take
but it was hell you gave back to us

we've learned our lessons well
we'll take our desperate times
and answer desperate measures
when everything you have is gone
the only thing you want
retaliation for the lost
it never was enough for you

the blood and the pride
will only bring us more burials

(chorus)

please, please call for help
we need a paramedic on the scene now
or will you run to save yourself
and just leave me here until i bleed out

i should have seen this coming
how was i supposed to know
that you would abandon me

a cold and empty feeling
from a heart that turned to stone
i hoped it was enough for you
we wait and we laid
but you never came back for us

(chorus)

please, please call for help
we need a paramedic on the scene now
or will you run to save yourself

and just leave me here until i bleed out

surrounded by TV screens
and visions of a empty dream
paralyzed by belief
and all we take for granted
i need to know

what happened to my life, my love, my hope

please,please call for help
we need a paramedic on the scene now
or will you run to save yourself
and just leave me here,
leave me here until i bleed out

we need a paramedic on the scene now(x2)
