

# New Day

George Benson

All that new days' coming soon  
All that new days' coming soon  
Oh how I wonder  
It really makes me wonder  
What's happened to all the plans that we made  
Looks like there all out of view  
Oh and everyday life changes the set it rearranges  
And all the players change their costumes  
Well I know we need a brand new day, new day  
With what I see we need a new day, new day  
Well I know we've got to have a new day, new day  
And that new days coming soon Oh how I wonder  
It really makes me wonder yea  
Where is so much of the beauty that we see?  
Now I'm wondering if it's all been in a dream  
Times, they go from bad to worse  
Seems it's all been rehearsed  
We were standing here acting out this scene Well I know we need a brand new day, new day  
From what I see we need a new day, new day  
I really do think we got to have a new day, new day  
And that new days coming soon  
Oh how I wonder  
It really makes me wonder dooo dooo...I know we've got to have a new day, new day  
I really do think we got to have a new day, new day  
From what I see we need a new day, new day  
And that new days coming soon  
Oh how I wonder, really makes me wonder yea With all the trouble in the world we need a new day, new day  
With all the moaning broken hearts are crying, new day  
All our loved ones are slowly dying, new day  
I know we need a new day, new day  
And that new days coming soon  
And that new days coming soon  
Repeat to fade....Cecil Womack not sure which one
