

White Light

Starsailor

There's a white light that carries me home
Helps me focus when I am alone
Keeps on teaching me how to be loved
And to love, and to love Onward to forever
Our minds belong together She's the good light that carries me on
Helps me focus on where I've gone wrong
Now you've reached me
It's time to forgive and forget, and forget Onward to forever
Our minds belong together
Onward to forever
Our minds belong together Tonight, this land
Belongs to me
The shifting sands
The shining seas Onward to forever
Our minds belong together
Onward to forever
Our minds belong together Tonight, this land
Belongs to me
The shifting sands
The shining seas Won't you help my soul to grow?
To heal, it's all that I know
