

Within These Walls

Damon & Naomi

When I hold my hand above the flame
When I hold my breath beneath the wave
Come to me, find me there
Come save me, find me there
All I have is you In this world too unkind
In this place too cold
In this night that is too long When I lose sight of what is real
When I can't escape the way I feel
Come to me, find me there
Come save me, find me there
All I have is you In this world too unkind
In this place too cold
In this night that is too long
