Just One More Time

Matchbox Bluesband

Oh yeah!
That's just fine!
Come on boys!
Just one more time!I think I can explain about how the pigs music works.
Well, this should be interesting.
Remember that they make music with a very dense light.
And remember about the smoke standing still and how they,
They really get up tight,
When you try to move the smoke, right?
Right...
Yeah...
I think the music in that dense light
Is probably what makes the smoke stand still.
Any sort of motion has it's effect on, on the pony's manes.
You know, the thing on their neck.
Hmm...
As soon as the pony's manes starts to get good in the back,
Any sort of, like motion, especially of smoke or gas,
Begins to make the end split.
That's the basis of all their nationalism,
Like if they can't salute the smoke every morning
When they get up.
Yeah, it's a vicious circle, you got it!
