

# White Light

## Shura

You're different  
I like it  
You're from another planet, huh?  
I'd like you to take me there  
You can fly your alien spaceship You're different  
Don't hide it  
That's what made me notice you There you were  
Sitting by yourself  
There you were  
Hey, hey, hey You are a white light  
Stepping out of the dark  
You are a white light  
But you cover it up Do you wanna fly me miles away  
And be alone, alone?  
'Cause I don't mind if we never go  
Never go home  
Stepping out of the dark We're shoulder to shoulder  
Leaving for your universe  
And I can't control you  
(No I don't no I don't)  
Yeah, I can't control you And there you are  
So self-contained  
There you are there You are a white light  
Stepping out of the dark  
You are a white light  
But you cover it up Do you wanna fly me miles away  
And be alone, alone?  
'Cause I don't mind if we never go  
Never go home  
Stepping out of the dark You are a white light  
Stepping out of the dark  
You are a white light  
But you cover it up Do you wanna fly me miles away  
And be alone, alone?  
'Cause I don't mind if we never go  
Never go home  
Stepping out of the dark  
'Cause I don't mind if we never go  
Never go home

Don't mind if we never go  
Never go home
