gimme animosity

Superdrag

Wasn't easy to ignore
I had never really seen it before
Wasn't easy to explain
One good reason to be glad it didn't rainGimme reciprocity, it's all coming home
Gimme animosity with absence of bone
From a low trajectory, acting alone
Couldn't he defect to me? He's waiting and lonelyWasn't easy to survive
For the rest of us still left here alive
Wasn't easy to explain
One good reason to be glad we should remainGimme reciprocity, it's all coming home
Gimme animosity with absence of bone
From a low trajectory, acting alone
Couldn't he defect to me? He's waiting and lonely, waiting alone
