One In A Million

Down With Webster

I'm feeling like I'm one in a million
I'm the real thing, I can see it
Like a fire in the night, it's so brilliant
I'ma stand out, no concealing it
And I'm feeling like I'm one in a million

I'm the one and six figures
Hold it down like I got six fingers
Feel it pound when it hits the speakers
Jump around, jump out your sneakers
And all of my time is prime
You ain't never seen sh*t like mine
Light the fuse from the way I shine
Just one spark I'll blow your mind

Everyone, everyone wants something
There's a million in one, a million in one
But I'm the one in a million
The one in a million
You could be a stray star
Underneath the radar
Diamond in the rough
But that's still not enough
I'm the one in a million

I'm feeling like I'm one in a million
I'm the real thing, I can see it
Like a fire in the night, it's so brilliant
I'ma stand out, no concealing it
And I'm feeling like I'm one in a million

Shake it up and then spray that
Celebrate when we play that
This real deal, can't fake that
I'm the needle up in this haystack
When I drop it hold up your open hand
For the drop in the ocean that broke the damn
I'm overflowing on every jam
And we made it rock from one grain of sound
Now go, go, time to show 'em all who we really are

Go, go, it's not dizziness but you're seeing stars
So, so, so what's a star to a comet
That's burning across the sky
And tonight I'm so supersonic

Everyone, everyone wants something
There's a million in one, a million in one
But I'm the one in a million
The one in a million
You could be a stray star
Underneath the radar
Diamond in the rough
But that's still not enough
I'm the one in a million
In a million...

I'm feeling like I'm one in a million
I'm the one in a million
I'm the one in a million
I'm feeling like I'm one in a million
