

# Voldemort (feat. John Floreani)

## With Confidence

I remember the first night that she said,  
"Oh, maybe I can do this on my own."  
And amongst all the reassurances and reoccurrences you will not be alone,  
And I know that you're holding out for better weather  
And I can't promise you that I'll be round forever  
If there's one thing I know it's that we're good together  
(If there's one thing I know it's that we're good together) And I will try to hold you up through those times when  
you are gone  
Despite the weather, it gets better,  
You won't do this alone (do this alone)  
I remember the first night that she went  
To find her little place inside this world  
I won't forget the way she broke her tape down,  
She needed it now  
She ran into it all  
And I know that you're holding out for better weather  
And I can't promise you that I'll be round forever  
If there's one thing I know it's that we're good together  
(If there's one thing I know it's that we're good together) And I will try to hold you up through those times when  
you are gone  
Despite the weather, it gets better,  
You won't do this alone
