

# Second Life Syndrome

## Riverside

Part One - From hand to mouthFrom day to day

From hand to mouth

We're turning around

Vicious ritualGetting used to it all

Falling down again

We're waiting for

The decrees of providenceI don't want to waste

Any more of my life

Live from day to day

Live from hand to mouthFacing the light

I brush aside your plans

I'm going to have

It all my own wayAnd when that all shattered I felt I'd broken my fall

Couldn't pretend that I felt strong about us anymore

Without your help I finally started to live my own life

I just want you to know this timePart Two - Secret ExhibitionI just want to feel your sigh on my neck

Want to feel your breath

Feel your need to stay

You don't know my name

Don't know my face

Only thoughts I share in my secret placeSecret exhibition

Cure for loneliness

I've ground to a halt

There's no turning back

You know there are things I just can't forget

You've helped me so much

To learn to be detachedBut when that all shattered I felt I'd broken my fall

Couldn't pretend that I felt strong about us anymore

Without that help I finally started to live my own life

And I know I don't need you nowSecret exhibition

Cure for loneliness

Life is much too short to be whiled away with tears

Secret exhibition

Cure for loneliness

I erase you now

I don't need you now

I erase you now with all of my pastPart Three - Vicious Ritual (instrumental)
