Machine Inside

Early Grey

Verse 1
It's been so many long years ago
Woman met a serpent and he gave her power
To choose between right and wrong
Since that day we cursed to live in pain

To be or not to be, to dream or not to dream
You've heard it all before, you're coming back for more
Heart and mind collide. The one is gonna die

Bridge 1
Don't say that it's over, raise up your head
You got to believe it's coming your way

Chorus 1
Machine inside, it's gonna take over
You got to believe it, baby
Machine inside, you got to believe it -
It's gonna be new world order

Machine inside, the end's gettin' closer
You got to believe it's coming your way
Machine inside, the heart is moved over
To give a place to bytes in your brain

Machine inside!

Verse 2
We're running in circles of lies
Life is here today, the future is gone tomorrow
And we'll pay the ultimate price
For allowing this war to begin

Age of dignity and humanity
Is coming to an end. Could we start again?
Heart and mind collide. Let the strong survive

Bridge 2
They say that it's over, dawn of the dead

So run for your life cause it's coming your way

Chorus 2
Machine inside, it's gonna take over
You got to believe it, baby
Machine inside, you got to believe it -
It's gonna be new world order

Machine inside, the end's gettin' closer
You got to believe it's coming your way
Machine inside, the blood's gettin' colder
The devil awakes and he's coming to stay

Bridge 3
You know that it's over, end of the game
So raise up your hands for lord of last day

Chorus 3
Machine insiiiiide! It's gonna take over
You got to believe it, baby
Machine inside, you got to believe it -
It's gonna be new world order

Machine inside, the end's gettin' closer
You better believe it's coming
Machine inside, it's gonna take over
The devil awakes - he's coming your way

Machine inside (x8)
