

# Break Even

[Kixxie Siete](#)

Well this is pretty low, it aint the bottom  
Still a long way to go, could I get you to follow  
It all comes down to this just give me a reason  
Cause I know I?ll know I?ll never win, we could break even  
Cause I really don?t care, I really don?t care whose side I?m on  
Cause there is always room at the bottom once the line?s been drawn  
And I know I?ll never win, just let me go on believing  
But there is still a chance that we could break even  
Well this is gonna hurt, I can ease your pain  
Cause once you?ve felt the fire you don?t mind the rain  
If you go down, down, down out in the deep end  
Could you pull me up just enough to break even

Cause I really don?t care, I really don?t care whose side I?m on  
Cause there is always room at the bottom once the line?s been drawn  
And I know I?ll never win, just let me go on believing  
But there is still a chance that we could break even  
There?s still a chance, still a chance she could save me  
There?s still a chance I?ll just bring you down  
Cause I really don?t care, I really don?t care whose side I?m on  
Cause there is always room at the bottom once the line?s been drawn  
And I know I?ll never win, just let me go on believing  
But there is still a chance that we could break even  
There is still a chance that we could break even

Yeah

I just wanna break even
