

Road To the Throne

Our Last Night

[Verse 1]

Pushed us out like a stranger in the crowd
Could cut so many times I don't bleed out
And you keep trying but can't hold me down[Pre-Chorus]
I always knew that we could make it through
But you can have your doubts, you can have your doubts
I think it's time for you to move along, move along[Chorus]
We're setting fire to the weight that held us down
We're burning brighter and you're gonna hear us now
Cause we're singing whoah, whoah

This is the road, the road to the throne[Verse 2]

Waiting for us to roll into our grave
No grief no tears just forgotten names
You really think that we would go that easily?[Pre-Chorus]
I always knew that we could make it through
But you can have your doubts, you can have your doubts
I think it's time for you to move along, move along[Chorus]
We're setting fire to the weight that held us down
We're burning brighter and you're gonna hear us now
Cause we're singing whoah, whoah

This is the road, the road to the throne[Verse 3]

You said we were worthless
And how we're not worth your time
But now you've come running back to us
But we don't care because we never needed you[Chorus]
We're setting fire to the weight that held us down
We're burning brighter and you're gonna hear us now
We're singing whoah, whoah
This is the road, the road to the throne
We're setting fire to the weight that held us down
We're burning brighter and you're gonna hear us now
Cause we're singing whoah, whoah
This is the road, the road to the throne
