

# Away

## Bella Morte

Away, we grow cold as years pass  
Who we were echoes stillI remember your smile still  
    Though you're far away  
    I remember tears on your face  
Though the reasons fadeAway, for so long we were one  
Though dreams fade we are strongRain is merely tears on your face  
    Yet still hope remainsSo long my love may we never fade  
    Our time lives on in a land within  
    So our eyes may find smiles from our distant days  
    And at night our stars burn as long as before
