

I'd Just Be With You

[Julianne Hough](#)

We could spend the day maybe melt away
On some romantic coast out in the tropics
Oh baby we could disappear, wintertime is almost here
You'll stay warm with your hands inside my pockets Nobody says we've gotta stick around
Sometimes you've gotta look inside
And find your own way out
Somewhere you'll find an answer you can use
But if it were me I'd just be with you You find it hard to sleep, you fight the dark
And try to keep some distant light to hold it all together
Turning circles on your Ferris wheel
Aren't you tired of climbing that hill?
I could be the rain falling in your desert Nobody says we've gotta stick around
Sometimes you've gotta look inside
And find your own way out
Somewhere you'll find an answer you can use
But if it were me I'd just be with you Oh baby, we could run away
Search the world for a better place
But me I'll always wanna stay with you Nobody says we've gotta stick around
Sometimes you've gotta look inside
And find your own way out
Somewhere you'll find an answer you can use
But if it were me I'd just be with you
Oh, if it was me I'd just be with you
