

Shed My Skin

Blue Rodeo

You've got troubles on your mind Keeps you away from me There's no sense in denying
And I've cursed myself for the longest time And now I find I just don't mind Leave your coat beside the door
Come and lay here On this blanket on the floor And we'll throw our candles In the flames tonight Set it right try to
set it right (chorus)

When all our tears coming down are gone And I shed my skin before this evening's done If we never get the
chance To come back here again I'll understand you know I'll understand You know I'll understand All the spirits
of the night Watch us sleeping here Beside the firelight And I'll hold my tongue
Till this moment's gone Kiss the dawn
Stay to kiss the dawn (chorus)
