

# Silver Shadow

## Incognito

Silver shadow

Silver shadow, a glowing shadow shining brightly for all to see

I remember gazing on this quiet night, the stars were bright as they could be  
Wonderin' if things would ever go right and if there was a spot up there for me

Then one star got brighter by the minute  
Strange that it seemed to have my name written in it  
I reached for the star and it kissed me with its light  
It made me cast a shadow that was silver and bright

Silver shadow, a glowing shadow shining brightly for all to see

I never had any real reason to thank my lucky stars  
But now I've got a pretty good reason 'cause I know I'm gonna go far

I believe in magic, I really do  
With all that's happened, it's got to be true  
I cast a silver shadow from the kiss of the light  
I knew that I was destined starting with tonight

Silver shadow, a glowing shadow shining brightly for all to see  
Silver shadow, my future's shadow trying to tell me of the star I would be

Since I was chosen among the rest, I dedicate myself, I'm gonna be the very best  
And my shadow forever silver will remain and the world will always remember my name

Silver shadow  
A glowing shadow  
Shining brightly  
For all to see

Silver shadow, a glowing shadow shining brightly for all to see  
Silver shadow, my future's shadow trying to tell me of the star I would be

Hey, yeah  
Look at my shadow glow  
Silver and wonderful sparkling thing  
Look at my shadow glow  
Think I'm gonna be a star  
Look at my shadow glow  
Glowin' so brightly, this wondrous thing

Look at my shadow glow  
Look at my silver shadow
