

Only You

Tesla

In a world far from perfect
It's not always easy to connect
Where everything can be so complicated
I know that simply, you're the best I don't want nobody else; I only want you
Wanna keep you for myself; it's selfish, but true
I don't want anything to ever come between us
'Cause I don't want nobody else In a world far from perfect still
One never knows what to expect, so, tell me, what will I do?
So hard to think of you as dearly departed
If only desperation could resurrect 'Cause I don't want nobody else; I only want you
Not some picture on a shelf, no
'Cause that won't carry me through
How does debilitated find the strength to make it through? 'Cause I don't want nobody else, only you
Now I don't want nobody else; I only want you
And not some picture on a shelf, oh no
'Cause that won't carry me through
How does asphyxiated ever find the breath to make it through? 'Cause I don't want nobody else
I don't want nobody else
Only you, only you
