

# Cloning Technology (Replica)

## Fear Factory

I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way Filled with pain  
Bruised and darkened soul  
Spare me from the  
Life that's full of misery I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way That way  
What?  
That way, that way Filled with pain  
Bruised and darkened soul  
Spare me from the  
Life that's full of misery I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way  
I don't want to live that way
