

Heat Dies Down

Kaiser Chiefs

I can just imagine you and me
Running out of steam, going through the motions
And I have no idea how you know
When I dip my toes in other people's oceans 'Cause you have local knowledge of the local area
And that impressed me quite, so I tried that night
To do all the things I thought you'd like but that just made it worse
And I impressed you not, well, not a lot So we started from the start When the heat dies down, I'll be back in
town
And until that time I'll be round at mine
And when the heat dies down I'll be back in town
And until that time I'll be round at mine When the heat dies down
When the heat dies down
When the heat dies down
When the heat dies down I cannot imagine growing old
To have and to hold, 'til death do part each other
As I doubt I could stall my 20 years
Spending time at hers and talking to that mother 'Cause I got a wider knowledge of the world
I just can't face another argument about the rent
It all seems unimportant in the grander scheme of things
'Cause I was purpose built to not feel guilt So we ended at the end When the heat dies down I'll be back in town
And until that time I'll be round at mine
And when the heat dies down I'll be back in town
And until that time I'll be round at mine When the heat dies down
When the heat dies down
When the heat dies down
When the heat dies down When the heat dies down
Heat dies down
When the heat dies down
When the heat dies down
