## I, Voyager

## Nevermore

If you view life as a mission For truth and purity in vision You can become as the anointed And fade away from the disjointedIn observation, I analyze All the aspects of humanity that I despiseI am the voyager I have tasted pleasures of the flesh And drunk the pleasures of the mind To reach the point I've attained Clear focused and definedThose who don't create dictate The structure of our world and preach hate Drifting out of languid boredom To destroy the structure of our kingdomIn observation, I analyze All the aspects of humanity that I despiseI am the voyager I have tasted pleasures of the flesh And drunk the pleasures of the mind To reach the point I've attained Clear focused and definedIf you live life draped in sorrow You will destroy the path we follow Take my hand and walk in wonder The patterns spin in random orderIn observation, I analyze All the aspects of humanity that I despiseI am the voyager I have tasted pleasures of the flesh And drunk the pleasures of the mind To reach the point I've attained Clear focused and defined I am the voyager I, Voyager
