

Nothing to Fear (feat. Mike Dore)

Gilbert O'Sullivan

Love your music and love the songs Only query, don't get me wrong Is this really the way you appear Then
again if you feel it's right Go ahead if it's what you like You got (you got) you got (you got) nothing to fear See
that building with all it's floor See those people go out it's doors They don't know it but they're why you're
here make a record that they all bum make it appealing to every mum You got (you got) you got (you got)
nothing to fear So you've had a bad experience And you don't know who to trust well if you want me to
represent you then in me you must trust I'm not promising you the earth I'll bow out if it doesn't work You got
(you got) you got (you got) nothing to fear [Solo] You got (you got) you got (you got) nothing to fear Have to
say when I heard your voice Wasn't sure if it was my choice Then I listened again and I could hear Don't ask
why but I'm certain you will make it big and the day you do You got (you got) you got (you got) nothing to fear
But suppose in the studio (I'm)(he's)unhap
py with a take will you let (me)do it again (him) (Of course I will say okay) Don't be worried about your songs
I'll look after them every one You got (you got) you got (you got) nothing to fear
