

# Brunch

## S

It's so hard  
to see you  
around here  
everyday  
you wake up  
thinking  
about you  
but nothing's changed you fake it  
you go on  
you forget  
you move on  
and this is how it all gets played  
I wish you hadn't called last night  
and talked about North Carolina  
I know about the girl you fucked  
and yeah think I might throw up  
as for us us we're over  
and we don't want it to mean a thing  
let's talk about the way you deal  
everything you never feel so it hurts  
if you say  
you miss me  
when you're drunk  
and the phone rings  
I can't breathe  
I know you're  
with someone else  
you fake it  
you go on  
you forget  
you move on  
and this is how we all get played and you already broke my heart  
all of this is pointless  
I can do things  
that will hurt you too sorry that it's shameless  
as for us we're over  
and we don't want it to mean a thing  
let's talk about the way you deal  
everything you never feel You never did any of that

You never said any of those things  
You never even called me back  
Never wanna know what love means I never did any of that  
You never said any of those things  
You never even called me back  
I don't wanna know what love means You never did any of that  
You never said any of those things  
You never even called me back  
I don't wanna know what love means You never said any of that
