## We Have Band

I was looking at you  
You were looking at me  
It was easy to see  
That it was one of your lies Is it working for you?  
'Cause it's working for me  
Let's count to three  
No, it's not hard to disguise Was it part of the plan  
Taking me by the hand  
Being one of the damned  
On this merry-go-round? It's not hard to explain  
Don't hide your shame  
Just play the game  
You're one of many we've found Crystal  
You take me out this way  
You take me out this way  
You take me out this way  
You take me out this way You take me out this way  
You take me out this way  
You take me out this way  
You take me out I was looking at you  
You were looking at me  
It was easy to see  
That it was one of your lies Is it working for you?  
'Cause it's working for me  
Let's count to three  
No, it's not hard to disguise
