

# Little Lies

**Tarja Turunen**

Take my faith with an open hand  
And warm embrace my confidant  
Use my words, take the good away  
And leave the worst to sell me out Little lies, little lies  
Making up tragedies  
Nothing is what it seems  
Who cares what is real Little lies, little lies  
Only to entertain  
The message is all the same  
For those who believe Feed the flames empty wishes  
With no room to blame my sacrifice  
Deep inside there is nothing  
Left to stand behind but little lies Little lies, little lies  
Making up tragedies  
Nothing is what it seems  
Who cares what is real Little lies, little lies  
Only to entertain  
The message is all the same  
For those who believe Little lies, little lies  
Little lies Little lies, little lies  
Making up tragedies  
Nothing is what it seems  
Who cares what is real Little lies, little lies  
Only to entertain  
The message is all the same  
For those who believe
