

Strange

Built to Spill

This strange plan is random at best
This strange how much more can I take?
This strange changing atmosphere
And in gravity too and its severity
This strange day is almost over
Just started to get sick of it And it's strange, but not all that strange
Yeah it's strange, but what's so strange about that
Yeah it's strange, but why is that strange
Yeah it's strange, but oh well This strange plan is random at best
This strange how much more can I take?
This strange sound you said, I said
You're not listening or I'm not saying it right
This strange war of promises
Let's call us a truce, well call it the truth And it's strange, but not all that strange
Yeah it's strange, but what's so strange about that
Yeah it's strange, but what isn't strange
Yeah it's strange, but oh well
