

# Wish I Could

Norah Jones

We met in a place I used to go  
Now I just walk by it for show  
Can't bear to go in without you, you know  
Wish I could  
Wish I could But Annie is standing in the door  
With a look on her face I can't just ignore  
She tells me that her heart is sore  
And pulls me in  
She pulls me in She says, "Love in the time of war is not fair  
He was my man but they didn't care  
Sent him far away from here  
No goodbye  
No goodbye" I don't tell her that I once loved you too  
Or about all the things we used to do  
I kiss her hair and think of you  
Walking down the road you found
