Outerspace

Evan & Jaron

Advisory - the following lyrics contain explicit language:

It's lonely here in outerspace
The nearest stars are miles away
But I believe, I'm on to something bigI've only come to not be found
To circle high above the ground
And watch everyone else for a changeDon't you ever wish you'd never
Don't you wonder if your face might shine
Without the pies of liesI've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
The bright lights from the starlights
And the canyons from the hillsTo all the girls who wish to be
Immortalized in fantasy
I wrote this song for you and not for meI'm the senator of a lonely state
Too far gone, I've sealed my fate
I'm so tired of bein' blown out with the causeDon't you ever wish you'd met her
Don't you wonder if your face might shine
Without the pies of liesI've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
The bright lights from the starlights
And the canyons from the hillsI've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
I've arrived and it's hard to tell
Ohh, the bright lights from the starlights
And the canyons from the hills
I've arrived I'm doing well
Quite a view from the top
Though it is cold as hell
