

Stuck To You

Hellogoodbye

Holding my breath
For almost a whole month
If I held your breath
At least we would touch Keeping from you
Keeps me from sleep
It's just this bad beat
That I just can't keep Oh, girl it's true
I can never be away from you
It's like you gloss your lips with glue
Oh, we kiss and I am stuck to you My heart's on the floor
My feet feel like lead
I'd quit the tour
But I'm already dead Our only connection
Is synthetically
We show our affection
Electronically Oh, girl it's true
I can never be away from you
It's like you gloss your lips with glue
Oh, we kiss and I am stuck to you We lock lips and throw the key out
Till it slips that I must leave town
Our love reaches across oceans
To your beaches, lonely notions Oh, girl it's true
I can never be away from you
It's like you gloss your lips with glue
Oh, we kiss and I am stuck to you
