Stuck To You

Hellogoodbye

Holding my breath For almost a whole month If I held your breath At least we would touchKeeping from you Keeps me from sleep It's just this bad beat That I just can't keepOh, girl it's true I can never be away from you It's like you gloss your lips with glue Oh, we kiss and I am stuck to youMy heart's on the floor My feet feel like lead I'd quit the tour But I'm already deadOur only connection Is synthetically We show our affection ElectronicallyOh, girl it's true I can never be away from you It's like you gloss your lips with glue Oh, we kiss and I am stuck to youWe lock lips and throw the key out Till it slips that I must leave town Our love reaches across oceans To your beaches, lonely notionsOh, girl it's true I can never be away from you It's like you gloss your lips with glue
