

Run the World

Jennifer Lopez

Advisory - the following lyrics contain explicit language:

Uh, we got it locked, but they know it
And whenever we around it goes down like Drano
Uh and it's nothing to spend these pesos
And you will never see us with a fake one
You can call it in the low, low
Police on our arms with a thousand in the trunk uh
Ain't nothing greater
Hanging out the window straight busting at you law hatersBonny Clyde
No other girl will ever ride like I ride
That's why you need me on your passenger side
Let me help you get that paper
Hanging out the window busting at them love haters
Me and you
I'm the closest you'll ever be to truth
There's never a question of what I'll do
Uh huh for you
With me you'll never lose so (that's right)Call on your girl that can hold you right
I'll be your protector I'll never forget ya
You need somebody that can hold you tight
I'll be your armor, keep you out of harm boy
I'll be your anything, everything
Rockin' roll with ya
If things get too hot out in the cold with ya
Froze froze with ya, me and you togetherOur love could run the world
Run the world
Our love could run the world
Run the world
Our love could run the worldI'll be your anything everything
Rockin' roll with ya
If things get too hot out in the cold with ya
Froze, froze with ya
Me and you together

Our love could run the world
(Run, run, run, run, run, run, run, run)
(Run, run, run, run, run, run, run, run) We'll make it through
Any weather baby, don't pay them any attention
It'll just drive you crazy
All that really matters is our love for one another
And all we'll ever have
Is each other
Let a chick try to come around
Lord knows she'll never be down
She'll never have your back, wouldn't know how to act
I can't say it, know it better than that Call on your girl that can hold you right
I'll be your protector I'll never forget ya
You need somebody that can hold you tight
I'll be your armor, keep you out of harm boy
I'll be your anything, everything
Rockin' roll with ya
If things get too hot out in the cold with ya
Froze froze with ya, me and you together Our love could run the world
Run the world
Our love could run the world
Run the world
Our love could run the world I'll be your anything everything
Rockin' roll with ya
If things get too hot out in the cold with ya
Froze, froze with ya
Me and you together
Our love could run the world
(Run, run, run, run, run, run, run, run)
(Run, run, run, run, run, run, run, run)
Our love could run the world Don't you see, there's no love like you and me
Can't you see, baby there's nobody more powerful than we
Can't you see that I'm the only thing you'll ever need
Can't you see that, can't you see Our love could run the world
Run the world
Our love could run the world
Run the world
Our love could run the world I'll be your anything everything
Rockin' roll with ya
If things get too hot out in the cold with ya
Froze, froze with ya Run the world
Our love could run the world
(Run, run, run, run, run, run, run, run)
(Run, run, run, run, run, run, run, run)
Run the world

Our love could run the world
