

# Make My Day

## Nixon Now

Woke up late  
World won't wait  
So I make my way downstairs  
Mom freaks out  
Please don't shout  
I still have to dry my hair  
I've been up all night  
Just thinking you're the one  
Who's in my dreams  
My heart just keeps on jumping  
When I think what we could be  
Just go ahead and make my day  
You make the world just melt away  
When things go wrong and skies are gray  
Just make my day, make my day  
Second bell  
Show and tell  
At my locker down the hall  
Heart in throat  
See your note  
And it turns out after all  
You've been up all night  
Just thinking I'm the one

Who's in your dreams  
Your heart just keeps on thumping  
When you think what we could be  
Just go ahead and make my day  
You make the world just melt away  
When things go wrong and skies are gray  
You just make my day, make my day  
We're holding hands  
We're walking home  
We don't know what to say  
But later on  
I read your text  
You made my day  
Here we go! Ha!  
Just go ahead and make my day

You make the world just melt away  
When things go wrong and skies are gray  
You just make my day  
Just go ahead and make my day  
You make the world just melt away  
When things go wrong and skies are gray  
You just make my day, make my day  
You just make my day
