

Give Me Your Love (feat. Alia Rose)

Teena Marie

All the lady max that's hustling on my track say: give me your love, give me your love
All the lady max that's hustling on my track say: give me your love, give me your love
All the lady max that's hustling on my track say: give me your love, give me your love
All the lady max that's hustling on my track say: give me your love, give me your love Give me your love, give
me your love, give me your love
Give me your love, give me your love, give me your love
Give it to me good, give it to me good
Give me you love, it's good so good
Give it to me good, give it to me good
Give me you love, it's good so good Want you so bad, can't even get mad at you
Well a thing you really swing, and I feel so good it's true
You're such a Kanye, make my lungs act
Breathing in the air
When I'm you I really notice ya
Just how much I care [Chorus]
Give me your love, give me your love, give me your love (give me your love, give me all your love)
Give me your love, give me your love, give me your love (give me your love, give give it to me baby)
I need your love (uh baby)
I want your love (uh baby)
I need your love (uh baby)
I want your love (oh baby) Settling a tingle all up and down my spine
Make every movement change
Make love all through the night
I want to be a part of you
Keep our thing up tight
Keep the faith in all you do 'cause everything is alright [Chorus] Give it to me good, give it to me good
Give me you love, it's good so good (it's good so good)
Give it to me good, give it to me good (give me your love)
Give me you love, it's good so good (it's good so good)
Give it to me good, give it to me good
Give me you love, it's good so good (it's good so good)
Give it to me good, give it to me good (give me your love)
Give me you love, it's good so good (it's good, it's good)
Give me your love, give me your love, give me your love Can't for the more you do, but you have to do
I share the weight whatever fate has wing to you
To worry bout no attitude you just be yourself
'Cause I can live with you in solitude
And need no one else Give me your love, give me your love, give me your love (give me your love, give me all
your love)

Give me your love, give me your love, give me your love (give me all your love, uh uh baby)
Give me your love, give me your love, give me your love (give me your love, give me your love)
Give me your love, give me your love, give me your love (give me your love, give give it to me baby)
I need your love (uh baby)
I want your love (uh baby)
I need your love (uh baby)
I want your love (uh baby)
I need your love (uh baby)
I want your love (uh baby)
I need your love (uh baby)
I want your love (uh baby)
I need your love (send a little tinkle)
I want your love (up and down my spine)
I need your love (make me wanna love you)
I want your love (you really blew my mind)
