

Just a Friend of Mine

Zoot Woman

Stop me in my tracks now
You know I'll go too far
I can't feel the moment
Let me see the starTake me through the motions
Know that you know how
All the things that captivate
You can save me nowAll the time going out of my mind
See your smile such a different style
All you want to be is just a friend of mine
All you want to be is just a friend of mineGood time conversation
How could I forget
I can't write off all the history
All that I regretFeeling contradicting
I can't work you out
Too long complicating
What we're all aboutAll the time going out of my mind
See your smile such a different style
All you want to be is just a friend of mine
All you want to be is just a friend of mine
