Infinite Combinations

John Wesley Harding

There was you and me and then there was him
Which leaves me out on a limb
Out in the cold where the wild things grow
Where no one sleeps 'cause no one knowsThat there are 26 letters
Just five vowels
And you can use them all
Yeah, it's allowedIf you've got the patience
'Cause there are infinite combinations
Infinite combinations
Infinite combinationsThere are cars on fire and burst balloons
Which one of us must mend soon
But it's a dark old path through the dead of night
There's only one way to get there rightThere are 20 million roads
20 million coming home
You can find the longest way
Yeah, it's not unknownIf you've got the patience
'Cause there are infinite combinations
Infinite combinations
Infinite combinationsYour heart is safe, I don't have a key
Your heart is a safe that's locked to me
But when the lights go out, I'll place my bets
'Cause we're not finished yet'Cause there are endless numbers
And there's finite moves
But you can try them all
Yeah, it's been provedIf you have the patience
'Cause there are infinite combinations
Infinite combinations
Infinite combinations
'Cause infinite combinations
