Leave It Alone

Broken Bells

All this time I'd never let you go
And I've seen things that've kept you in and holding down my soul
I set you up, I gave you life, I tracked you out the far
And know you've knocked me down, you shut me out
And I can see it in your eyes
So how you're guarded in your hair
But you could make it on your own
You were sheltered, loved and fed
But you just couldn't leave it alone

[Chorus]
Leave it alone, leave it alone
Leave it alone, leave it alone
Leave it alone, leave it alone
Leave it alone, leave it alone

But your heart was here resting on my lap
And I'd do it all again, but I'm never coming back
Well, I know I'm lying, lying in the cold
Yet a snow on the ground and if not on myself I be leaving down the road
I've been all around the world, but you can't know where to go
I give in to this lonely life, and you can't change me, not so

[Chorus]
Leave it alone, leave it alone
Leave it alone, leave it alone
Leave it alone, leave it alone
Leave it alone, leave it alone

It goes through all the green each and every night
All the distance lied
That's the hardest part to take
That's the heart of all my pain
Lying in the cold though the distance lied
Even Huey can't describe, Stewie know

Could it all be over now? We've seen it all the while
There's no dimension to the clouds
The moon and world around
That's the heart of all my pain

Cause I don't wanna go
All the distance lied
Even Huey can't describe, Stewie know
