

# Shadenfreude

Mira Calix

Shadenfreude  
Remember me  
Remember me through your life of misery  
Remember me  
Remember me through death and eternity  
Damage, joy  
A continuum of grief and despair  
Devastation and harm  
A death to the peace in your world  
Extract, delight  
From you and your suffering  
Your pain, it's my pleasure  
To choke all the life out of  
I was put on this earth to relish in the suffering of fools  
Yes, people like you  
The reason I exist is to ridicule and torment  
People like you  
It is my raison d'etre  
I exist for no other reason
