

# Polyps

## Cattle Decapitation

An onset of polyps  
Spurt from the rectum  
Like a bouquet of red fingers  
Painful, yet gorgeous So, this is what you get  
For this life that you've led  
Your blooming' tulips turning red Pulsating, Pappular  
Protuberance, Sessile villous adenoma Deep inside we can see with colonoscopy  
Stalactitical growths from hardened adipose  
Formations of bags contain polypular tissue  
Bursting open, causing anemia Histological tests reveal the presence of cancer  
Could have been avoided, somebody made a big mistake  
Substandard diet, consumption of meat led to this disease  
Atypical polyps bringing you to your knees Polypectomy  
On total obstructing colorectal cancer  
Merging tapeworms, make their homes in the polyps Blood, clots, hot enema  
Dead crotch, worms line the colon Disgusting pig worms in the polyps  
Nutrients sucked broken by solids  
A flexible sigmoidoscopy, revealing upper G.I. disease Blood, clots, hot enema  
Dead crotch, worms in the polyps Your colon shuts down  
Rectus cavernosa  
Finger-like polyps, stalactite deposits Caved in, bleeding  
Time for colostomy  
Poop shoot re-route to the side Now a bag of excrement is always stripped to your hip  
Everyone knows it and when you die you'll be screaming  
Why me? Why me? Why me This could have been stopped  
This could have been avoided  
This is what you get for being alive An onset of polyps  
Spurt from the colostomy hole  
This time with maggots  
And hungry anal mites So, this is what you get  
For this life that you've led  
Better off dead, death by polyps
