

I Believe You

Freschard

I believe you
When you say that you will reach into the sky
And steal a star so you can put it on my finger
I believe you
Baby, I believe you
I believe you
When you say that every time that we make love
Will be the first time we've made love
And every act of love will please you
Baby, I believe you
(*) blind faith makes me follow you
I'd live in a cave if you wanted to
Just ask me and I'll marry you
You don't have to sell me
