

# The Other Side of Love

Jack Savoretti

The girl  
Alone in her head  
The tears  
After what he said  
The fear  
Alone in the dark  
The pain  
She carries in her heart  
When all you've ever wanted is the freedom that you lack  
If you find a way to get up  
Keep on running and don't look back  
The other side of love  
The other side of love  
The boy  
So much to give  
The lies  
He's forced to live  
The son  
The father and his ghost  
The faith  
So scared him the most  
Hurts him the most  
When all you ever wanted it is the freedom that you lack  
If you find a way to get up  
Keep on running and don't look back  
The other side of love  
The other side of love  
The other side of love  
The other side of love  
Somewhere  
Hiding in the shadows  
It something  
Everybody knows  
We are angels  
We are demons  
We are children all the same  
We are angels  
We are demons  
We are children all the same

When all you ever wanted it is the freedom that you lack

If you find a way to get up

Keep on running and don't look back

The other side of love

The other side of love

The other side of love

The other side of love

We are angels

We are demons

We are children all the same

We are angels

We are demons

We are children all the same
