

Judgement

Iron & Wine

They walk out
And there's no sound
There's a candle burning
Lying up for they to see
The things beyond me This is why the eyes rise on me
So the nights comes on me
And it starts to breathe Tell me what did you think of me?
If I dropped a ring
When you say
When the moon is across the water Judgment comes when I'm all alone
And the glass door is closed
They heard that it's all left behind When you talk to me
You could swallow me That time brings me a place
When I hear your words
I feel you near
Fingers wanted to find a frozen memory Sometimes close the road
Direction down
Make you wish you could take it back I walk in and there's no sound
I walk straight to you
And I find you down
We took a walk where I left you We want to save
Save now and we won't be punished no more When you talk to me
You could swallow me That time brings me a place
When I hear your words
I feel you near
Fingers wanted to find a frozen memory Sometimes friends are long ago
Affections free to go
Find your right way
