

Volcano!

Grand Duchy

Is this song starting?

I'm a little confused Hey, muscle bear I love your hair

That 70's 'stache used up the cash

You saved my life, you saved my skin

So don't fall in that big volcano Everybody move the party 'cause it's time to go

That big volcano is about to blow Hey, he's going up straight to the top

He will not stop, he won't shut up

Caldera hot those flares are not

But he's courageous, it's so contagious Mr. Lonely is the only, he refused to go

That big volcano is about to blow He saved my life, he saved my skin

Just don't fall in that big volcano Everybody move the party 'cause we got to go

That big volcano is about to blow All Guadeloupe is on the sloop

But not my Verne, burn baby, burn Citoyens de basse-terre veuillez venir au port

Le bateau nous prendrons loin de Guadeloupe It's gonna blow, it's gonna blow

It's gonna blow, it's gonna blow
