Keep On

Tyler Hilton

Everybody knows
how's the story about the first one
Who tought'em how to hurt
Let their hopes astray
When it's gone on quite enough
And you're sick of staying down
I know what you need
You gotta live it like it sounds
When you lose what you love, live on live on
When the road gets too rough, be strong be strong
When you can't understand, but you're starting to see, it'll work in the end
You just got to believe, keep on keep on
I had my ideals, my plans were cutting dry
I will settle for a thing, yeah
You can forget all compromise

But I was tackled like a wave
And stomped on like the ground
Once we'll never change
Will slowly turning round
'Cause when you lose what you love, live on live on
When the road gets too rough, be strong be strong
When you can't understand, but you're starting to see, it'll work in the end
You just got to believe, keep on keep on
Yeah you can take it from me,
there's so much you can be,
and it's all gonna change whether it's you or them or me.
When you lose what you love, live on live on
When the road gets too rough, just be strong be strong
And when you can't understand, but you're starting to see, it'll work in the end
You just got to believe, keep on keep on
Keep on, keep on, keep on...
