

No Good With Faces

[Jack Johnson](#)

No good with faces and I'm bad with names
Gave me directions but it's all the same
I'm lost, I'm too tired to try Street lamps are broken, black the way I came
Who broke the moonlight? Watch it wax and wane
I'm lost, I'm too tired to try Let's not get ahead of ourselves now
There's no need for rain, it's our own parade
Let's not be afraid of our reflections
It's not only you, you're looking at now Road signs were stolen, left here holding this flame
Who stole my patience? Who stole my way?
I'm lost, I'm too tired to try Let's not get ahead of ourselves now
There's no need for rain, it's our own parade
Let's not be afraid of our reflections
It's not only you, you're looking at now Let's not get ahead of ourselves now
There's no need for rain, it's our own parade
Let's not be afraid of our reflections
It's not only you, you're looking at now Who you looking at now?
Who you looking at now? No good with faces and I'm bad with names
Gave me directions but it's all the same
I'm lost, I'm too tired to try
