Sugar Ray

You will recover when you discover baby
There is no other when you recover baby
And when the mood is right, you'll get it every night
Go on and play it light, your on the other side Your beautiful, beside me
Your beautiful, it's me I will let you, I will let you down Into another, don't run for cover baby
There is no other into another baby
And when the time is right I got you in my sight
I'll reach into your life and look around inside Your beautiful, inside of me
Your beautiful, it's me I will let you, I will let you down
I will let you, I will let you down Your beautiful, inside of me
Your beautiful, it's me I will let you, I will let you down
I will let you, I will let you down I will let you
I will let you
I will let you
I will let you
Let you down
