

# Melting into You

[Codie Prevost](#)

God you're beautiful, irresistible  
And I keep flying towards your flame  
When you just say my name  
I lose track of time, just forget that I'm the kind that needs nobody else  
I lose myself Melting into you with every thing you do  
I'm pouring out my heart, falling like a star  
You take my every breath, love me til nothings left  
I'm a candle burning, Girl it's true  
I'm melting into you  
I'm melting into you There's a hunger in your kiss, a fire on your lips  
A touch I've never felt before, that keeps me wanting more  
We'll start is where you end, then come in one again  
Given in and letting go, slowly I'm melting into you with everything you do  
I'm pouring out my heart, falling like a star  
You take my every breath, love me til nothings left  
I'm a candle burning, Girl it's true  
I'm melting into you  
I'm melting into you There's something in your eyes that's taking me so high  
There's nothing else but you and me tonight I'm melting into you with everything you do  
I'm pouring out my heart, falling like a star  
You take my every breath, love me til nothings left  
I'm a candle burning, Girl it's true  
I'm melting into you  
I'm melting into you  
I'm melting into you, baby  
I'm melting into you  
melting into you
