No Doubt

702

chorus:we gotta get down
to what its all about
and i want you
and thats no doubt
i can tell you notice me
only because i notice you
walked through the crowd to get your name
and to give you my tune
chorus

we dont have to talk about
all the things weve been through
just as long as you respect me
get to the point dont mess around
lets talk about how feel now
i just wanna know if we could take this thing that we feel
to a level where love is real
take it slow so we can last
look to the future forget the past!
chorus runs until fadaway
