Live to Learn

Super Stereo

A list of things we tend say
are we falling
what's fallingIf every action has a fate
is it equal
what's equalNight gives to day and day to night
its endless
what's endlessWhat's really there without the sight
can we taste it
lets taste itLive to learn we know nothing at all (nothing at all)Why put the creatures in the cage
did we change them
are we changingWe toss the wasted in the waves
it can take it
can you take itWho lit this world on fire
we're burning
everybody's burningOur hopes our actions our desires
just fake it
everybody's fakingLive to learn we know nothing at all
no concern we get high then we fall (then we fall)Look up to stars, look out to space
(look up to stars, look out to space)
Too close to mars, too far from faith
(too close to mars, too far from faith)To live and love and die's a waste
we're human
everybody's humanI need a reason to createLive to learn we know nothing at all
no concern we get high then we fall
Live to learn we know nothing at all
no concern we get high then we fall (then we fall)
